

NOISE ASSESSMENT

1. Is this RFP for the main branch, or all locations within the regional library system?

All branches.

2. How many people would be included in the assessments?

The Library has approximately 200 employees, however Job Hazard Analyses are only anticipated for a small subset (less than 10) in areas that have machinery, tools, or other materials that inherently require additional safety precautions.

3. Do you want separate written reports for each location, or one large report, with locations separated out in the report?

One large report.
